TOMORROW'S ASTRONAUT

My name is Ingrid. My parents and teachers tell me that I daydream too much. Well, it's true! I love to daydream! My favourite dream happens in the year 2094. I dream that I am going to travel to the red planet of Mars. Many important people are going to choose me, from 11 000 school-children, to be the first child-astronaut in the world. Thousands of people are going to watch my spaceship, "Zenix", leave the Earth to travel to the small planet, Mars. It is going to take a long time to get to Mars, but I am not going to be afraid. When I get to Mars, a robot is going to help me build a house. I am not going to swim on Mars because there isn't a lot of water there. But I am going to climb the high mountains and look at the two moons of Mars. I love this dream. I'm just sorry that the year 2094 is so far away.
