Drone Safety Tips

Over 2 million drones are expected to be sold in Britain in 2018. As more people enter the drone scene, however, the prospects for crashes and accidents also multiply.

(Paragraph 1) If you are a parent buying your children a drone, here are some safety tips to help ensure that you have a better and safer flying experience.

Fly in good weather: You can minimize a lot of problems by only operating your drone during ideal conditions. By the way, “good weather” for drones is not limited to clear skies and the absence of rain. You can have sunny days with strong winds, for example, which can make flying a drone a riskier experience. **(Paragraph 2)**

Don't fly over people: This includes keeping drones below 125 metres. **(Paragraph 3)** . This tip is best illustrated by the near miss experienced by skier Marcel Hirscher, who nearly got hit by a drone that was loaded with gear and fell out of the sky. If it had happened just two seconds earlier, he would have been seriously injured and possibly even killed. There have also been incidents of drones being shot out of the sky by people who are out hunting. Remember, not everyone is a fan of drones.

Don't fly over someone else's house: Unless you've got permission and a really good reason to do so, you really shouldn't be flying over other people's homes. If someone spies your drone, especially if it has a camera, things can escalate quickly. **(Paragraph 4)** And if your drone just happens to crash into someone's yard and hits a child, you risk going to jail.

Stay away from airports: Speaking of flying vehicles, drones and airports typically don't mix well. In fact, some drone apps include airports in their no fly zones. Moreover, you must know what the regulations say. **(Paragraph 5)** In early 2016, an Air France pilot had to switch from autopilot to manual flight controls in order to avoid a drone at Charles de Gaulle Airport in Paris. Another drone put 130 lives at risk after it nearly hit an airplane approaching London Gatwick airport in July last year. This has been just one out of the 99 incidents reported so far, compared to 62 in 2016 and 29 in 2015.
